

TRACE Sensors: The “New Normal” in Tagging, Tracking, and Tracing

As we return to work and to life in the “new normal,” companies are being challenged to keep employees and customers safe, and evolve their business processes to drive greater efficiency.

TRACE Sensors is an all-inclusive and scalable solution that enables you to overcome these challenges with asset and employee tagging, accurate real-time location tracking and physical distance monitoring, and comprehensive historical contact tracing to help your organization stay healthy. Originally developed for state-of-the-art asset tagging with unmatched accuracy, TRACE Sensors expands on those capabilities to deliver a comprehensive tracking, tracing, and tagging solution.

Accurate Real-Time Location Tracking and Physical Distance Monitoring

- ✔ Alert workers and customers when they are not maintaining proper physical distancing
- ✔ Demonstrate compliance with physical distancing regulations
- ✔ Maintain high-production capacity while keeping employees safe
- ✔ Monitor occupancy of common areas to avoid congestion in those areas
- ✔ Provide a safer work environment, reducing the risk of employees being exposed to an infection or virus, protecting themselves and their families.

Comprehensive Historical Contact Tracing

- ✔ Accurately determine the line of contagion to limit the spread of illness
- ✔ Confine possible outbreaks
- ✔ Limit area closures within the plant to only those that have been contaminated
- ✔ Accelerate response and sanitization efforts of contaminated areas so healthy employees can return to work

Optimized Asset Tagging

- ✔ Improve inventory control
- ✔ Enhance productivity and factory efficiency
- ✔ Optimize industrial asset utilization
- ✔ Monitor and control industrial workflows in real time
- ✔ Fully integrates with your existing ERP

Looking at Business in a New Way

Developed by **i-Virtualize** to address the rapidly growing needs of businesses to protect their employees and customers during the COVID-19 pandemic, **TRACE Sensors** enables organizations to adapt to a new way of doing business that increases their control, security, and safety while reducing costs.

Let our team help you — from configuration through support—transform your business, for the better. Call us at 647-367-1446 or email: sales@i-virtualize.com.
