

Turn Your Real-Time Location and Tracking Capabilities Up to 11

Real-time Location Services (RTLS) is an essential part of the Industry 4.0 revolution. But not all RTLS solutions are the same, and many have learned this the hard way. i-Virtualize wants to help you make the best decision when it comes to choosing an RTLS solution and partner.

We've developed an 11-point checklist to help you make the wisest decision and take your location and tracking capabilities to the next level.

- 1. Pinpoint Accuracy**
Sub-metre accuracy is a must-have, otherwise it's just a guess
- 2. Transformative Business Analytics**
Use the valuable data you collect to make better decisions, increase productivity, enhance performance and reduce theft.
- 3. Digital Twin**
Clearly identify—in real time—the locations of people, assets, tools, and inventory and uncover valuable insights into how scheduling, downtime, and maintenance affect production workflows.
- 4. Cloud-Based Storage**
From security to ease of use, cloud storage enables you to collect and store incredible amounts of data.
- 5. Single Easy-to-Use Dashboard**
Access information from any site using any device.
- 6. Customizable Reporting**
Integrated, holistic reporting provides you with deep data intelligence, rich visual analytics, and a powerful rules engine..
- 7. Non-Invasive Employee Tagging**
Maintain employee privacy while also keeping them safe in your plant with a wearable tag that only gathers location data when on your property.
- 8. Made for Your Environment**
Make sure your locators and tags can withstand your rugged factory environment.
- 9. Scalability in Size and ROI**
Evolving uses for RTLS positions your business to benefit from your initial investment several times over as use cases expand.
- 10. Backed by Innovative & Proven Technology**
Your RTLS solution should embody both innovative technologies with a proven industry-leading solution you can count on.
- 11. Delivered by a Partner You can Trust**
The first of its kind anywhere in the world, TRACE Sensors from i-Virtualize empowers smart factory transformation with a combination of the latest innovative technologies from ThinkIN and Quuppa, all supported by a strong Cisco digital-ready network backbone.
